learning®

PROFILE OF A LEARNER

Learners have skills in **critical thinking, problem-solving, creativity, communication, and collaboration** so that learners are prepared for an increasingly technology-driven future. Learners are empowered to identify and solve problems that affect themselves and their communities; to fail, retry, and learn from mistakes; to express their creativity in authentic ways; and to both struggle and have fun.

Learners **explore and play**, following their curiosity using varied tools (including, but not limited to, technologies).

Learners are challenged to **question, examine, and dissect** social systems, developing the confidence to address and deconstruct inequalities; and to construct a more just and equitable world.

Learners are connected to their communities, and, in an interconnected world, learners are supported to develop **cross-cultural understandings** that unlock opportunities to thrive both within and beyond their own communities.

Learners are connected across all the places they live, work, and play, including schools, libraries, museums, parks, clubs, community centers, centers of faith, at home, and online.

Learners have **deep and caring relationships with their families, peers, educators, and mentors.**

Ecosystem Support Strategies

We convene

We coordinate

We catalyze new ideas

We communicate

And we champion

CONVENE

Bring together a diverse cross-section of your community, organize them around a shared vision, and keep them engaged with ongoing opportunities to grow professionally and participate in the creation of communities of practice.

EVENT

March 4 @ 8:30 am

Professional Learning Workshop: Build|Fly|Code, an Introduction to Drones and Block Coding

Introduce your students to exciting new opportunities in flight and coding! This hands-on workshop will begin with the assembly of a Parrot Mambo drone.

EVENT

March 5 @ 8:00 am

Future Ready Partnerships Conference

Designed to bring together educators, employers, and partners to showcase impactful school-business partnerships from across the region and inspire new collaborations.

EVENT

March 5 @ 8:30 am

Innovative Educational Spaces: A Workshop to Redesign Learning Environments

Learn about ways to revitalize your space by updating furniture pieces, changing the layout of your space, and creating an environment that students don't want to leave.

COORDINATE

Establish a structure for the network that enables individual members to do what they do best, while also collaborating across sectors and sharing resources effectively.

OUR NETWORK

Working Groups

Working Groups powered by Remake Learning bring together network members to explore topics, practices, or issues of shared interest. Together, working group members dive deeply into their focus area to enhance their understanding of the subject, exchange knowledge and experiences with peers, and develop a shared vision for how their focus area can help shape the future of teaching and learning in the greater Pittsburgh region.

CATALYZE

Empower network members to put their ideas into action. Provide financial and other support for new initiatives and programs that directly impact children and youth, and create proof points for why learning innovation matters.

MOONSHOT

GRANTS

Bold ideas for the future
of learning

COMMUNICATE

Amplify the voice of network members by documenting success, sharing stories, and joining the global conversation about learning innovation.

Spark new ways of learning

Remake Learning sparks engaging, relevant,
and equitable opportunities to enrich
Pittsburgh's learning ecosystem.

[ABOUT REMAKE LEARNING](#)

Learning ecosystems make shift happen.

Educators **Shift** from
colleagues → **neighbors**

Systems **Shift** from
static → **dynamic**

Children **Shift** from
students → **learners**

Organizations **Shift** from
competitors → **collaborators**

Families **Shift** from
involved → **engaged**

Start your shift: ecosystem.remakelarning.org

We work better
when we work together.
